

US-23 Corridor

Dundee to Brighton

1 Livingston/Washtenaw Counties

- Around-the-clock, single lane closures will occur on US-23 between Barker Road and Silver Lake Road to accommodate bridge repairs. Single lane closures will start on northbound US-23 and continue for approximately two months (April – June). Once bridge repairs have been completed on northbound US-23, single lane closures will begin on southbound US-23 and will remain in effect for approximately two months (June-August).
- Bridge improvements will occur at four locations: the US-23 railroad structure just south of Barker Road, US-23 at Barker Road, US-23 at Eight Mile Road and US-23 at M-36.
- US-23 and M-14 will also be milled and resurfaced from the M-14/Barton Drive interchange east to US-23, and on US-23 north to Silver Lake Road.
- All pavement resurfacing will take place at night to minimize traffic disruption, except where 24-hour lane closures are in place for bridge work.
- There also will be short-term ramp closures to accommodate resurfacing of the ramps. A local detour will be posted.
- All work is expected to be completed by fall of 2007.

2 Monroe County

- Mill and resurface seven miles of US-23 from the Macon River (just north of Dundee) north to Plank Road in Milan. Other improvements include minor shoulder widening, drainage upgrades, and pump house rehabilitation near Cone Road.
- In addition, the Ann Arbor Railroad bridge near Cone Road will be raised to improve the under clearance of the bridge.
- During construction, one lane of traffic will be maintained in each direction on US-23.
- In addition, there will be short-term detours for work to lengthen the ramps at Plank Road and Cone Road. A local detour will be posted. The ramps at Plank Road and Cone Road will be closed alternately in order to maintain local access across the freeway.
- All work is expected to be complete by fall of 2007.
